UBE PHILIPPINES · UNIFIED BINARY ENTERPRISE

# Unify! Build! Enable!

Helping institutions build a **unified business ecosystem**.

THE PROBLEM

# Most organizations don't have a software problem.

# They have an architectural one.

## Fragmentation

Systems that don't talk to each other. Data re-keyed by hand between departments.

## Redundant Cost

Overlapping vendors and license bloat — paid in full, used at 20%.

## Security Gaps

Every disconnected system is an attack surface. No unified control or audit trail.

WHAT WE DO

# We transition organizations from fragmented tools to a single, coherent ecosystem —

# at the strategic and tactical level.

Consultancy · Software Development · Training & Development

OUR APPROACH · THREE PILLARS

# Unify. Build. Enable.

STRATEGIC METHODOLOGY

## UNIFY

System audits, target architecture, and IT roadmapping. We blueprint resilient, API-first backbones aligned to your 3–5 year business vision.

TACTICAL EXECUTION

## BUILD

We turn strategy into running systems — production-grade software and middleware, engineered lean, without open-source bloat.

TRAINING & DEVELOPMENT

## ENABLE

We equip your teams to design and maintain what we build — business analysis, system design, and executive capability building.

BUILD · OUR PRODUCTS

# We don't just advise — we ship.

Three tools, one philosophy: steer with clarity, publish with confidence, build without fear. Each is running in production. Click any card to open it live.

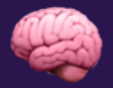

## S.H.I.P. ↗

Steering Hub for Integrated Performance — one source of truth to steer a whole venture.

## cms4i.app ↗

Enterprise CMS. Dedicated cloud per client, zero-API static publishing, security by default.

## lsip-eng

The thinking engine — a dual-engine AI knowledge protocol so your AI never breaks what it can't see.

THE PRODUCT LINE · AT A GLANCE

# One ecosystem. Three engines.

STEER

## S.H.I.P.

The operating system for a whole venture. One bridge to steer a scattered operation, a true ledger at the keel, and only the next decision that matters — surfaced, not buried. Any industry.

PUBLISH

## cms4i.app

The enterprise CMS done right — dedicated cloud per client, zero-API static publishing, security by default. No plugins, no bloat, no shared hosting. Already live in production.

BUILD

## lsip-eng

A dual-engine AI knowledge protocol. A graph engine maps dependencies across every project; a vector engine finds similar patterns. Your AI never breaks what it can't see.

Every product runs on isolated AWS resources — your own environment, your own data. Peso pricing, local support, engineering that understands local constraints.

Flagship Product

# S.H.I.P.

## Steering Hub for Integrated Performance

A steering tool for key stakeholders — a **single source of truth** to manage and control the execution of work across every phase of the business. Industry-agnostic by design.

### The Spine

Targets cascade down, status rolls up — every peso posted.

### Power Steering

Simplicity under massive complexity — surface the next decision, not a data dump.

### Witnessed Truth

Provable cashflow. Nothing hidden. Correctness you can see.

S.H.I.P. · ONE SHIP, MANY PARTS

# Steer a scattered operation from a single bridge.

**The Bridge** — directors steer the program

**The Keel** — the ledger that stays true

**The Manifest** — who is aboard, with what authority

**The Lookout** — observability, spot trouble early

**The Helm** — turn command into action

**The Engine Room** — settlement, payout, cashflow

**The Hold** — secure records & document vault

**The Cascade** — targets, status, roll-ups

PROOF · FIRST DEPLOYMENT

# La Zamba Island System

S.H.I.P. runs its first live venture — steering a geographically scattered island operation across its full lifecycle: capitalize → build → operate → settle & distribute → scale.

**ship.ube-ph.com ↗**

One platform. Nine lifecycle phases. A true, provable ledger at its keel. (Click to tour live.)

THE CORE BEHIND UBE

# Decades of experience — strategic, entrepreneurial, enterprise.

### 🏛️ Enterprise Solution Architecture

20+ years designing and scaling high-availability systems across government, banking, telco, and energy — AWS cloud-native, full lifecycle from discovery to operation.

### ☁️ Enterprise IT Transformation

General-manager-level IT leadership from one of the country's largest maritime & global-manpower groups — HRTech, FinTech, and digital platforms delivered at scale to a distributed workforce.

### 🎓 Two Decades of Training Faculty

Corporate and university training in business analysis, system analysis & design, SDLC, and technology strategy — delivered to private and government institutions.

### 🚀 Entrepreneurial Track Record

Founders and operators who have built and run software companies — proposals, costing, delivery, and P&L — not just technologists.

THE VALUE WE OFFER

# Why institutions work with UBE.

- **One ecosystem, not a toolbox.** We remove silos instead of adding another vendor.
- **Strategy that becomes a running system.** The same team that blueprints it, builds it.
- **Products already in production.** cms4i.app, lsip-eng, and S.H.I.P. — not slideware.
- **Dedicated infrastructure.** Your own cloud environment and data — never shared hosting.
- **We leave you capable.** Training is built into the engagement, not sold as an afterthought.

LET'S BEGIN

# Ready to unify your business ecosystem?

A system audit · a custom-engineered platform · corporate capability training.
Let's map out your ecosystem.
